SLIPTA/SLMTA Symposium
Training Workshops

Workshop #1:
Understanding Quality Control for Infectious Disease Testing
Wayne Dimech
10 minutes for Q&A at the end

Workshop #2:
Six Sigma to 90-90-90
Sten Westgard
10 minutes for Q&A at the end

20 minute break (14:40 – 15:00)
Understanding Quality Control for Infectious Disease Testing

Wayne Dimech, BAppSc, MASM, FAIMS, MBA, FFSc (RCPA)
General Manager
If there is one overriding aspect, it is that we need to develop a method of simple and understandable QC based on fact (rather than assumption) and then teach this in a manner that is practical to apply.

That’s my two bobs worth.

Wayne
Q & A Format

- Name
- Country
- Job Title/Position
- 1 Question
- Lengthy Commentary
Thank You
I am keen to discuss QC as it relates to serology with you and any other QC enthusiasts.

Monday, December 10th
5:45 – 6:45pm
piano lounge in the hotel lobby
Six Sigma to 90-90-90

Sten Westgard, MS
Director of Client Services and IT

Tools, Technologies and Training for Healthcare Laboratories

WESTGARD QC
Personally, I have shifted away from concentrating on the TE part and have started stressing the "a" part, for Allowable Total Error. Then, when it comes to characterizing method performance, I go straight to Sigma-metrics, and usually don't make a traditional TE calculation.

Hope this helps. Please keep asking questions!

Happy New Year and Regards,

Sten
